

UR-CN Webinar

Title: *Introducing CN ePortfolio and Implementing ePortfolio Assignments*

Time: Wednesday, April 14, 2021 between 3:00-4:00 PM, Rwanda Time

Location: Online via Zoom ([Unique Link to be sent to you after registration](#))

You only need to have a stable internet connection. You don't need to turn on your web camera or microphone.

Presenters:

Alice Zhao: Associate Director of Research and Development, IUPUI CyberLab / CourseNetworking

Dr. Byungura Jean Claude: Lecturer in BIT and CN Project Ambassador at University of Rwanda

Webinar Brief Introduction:

CN (CourseNetworking) accessed at (<http://thecn.com/>) is a social learning tool developed by our US partner institution, IUPUI. It is already added to every Module hosted at UR E-learning Platform.

Come join us in this webinar to learn CourseNetworking ePortfolio, an academic social ePortfolio platform that is lifelong and very easy to create. With the CN ePortfolio tool, your

students can store their learning artifacts, reflect on their learning experience, and demonstrate their competencies. The ePortfolio then becomes a nice branding of the students as well as their academic programs. It gives students advantages in job applications as a complement to simple transcript records and can help academic programs with new student recruitment, grant applications, and other opportunities. As a learning tool, the ePortfolio also can enhance learning reflection and as a new assessment approach. This webinar will present practical methods for you to integrate CN ePortfolio in your courses/modules or academic programs.

This webinar is open to all UR instructors and staff interested in teaching and learning with innovative technology. The attendees who complete a post-webinar survey will receive a ***Training Completion Certificate*** with the signatures of the university DVC-IA and the Director of IUPUI CyberLab.
